EXPERIENCE

Senior Staff Software Engineer

Jul. 2022 – Present

Druva Data Solutions

Pune, India

- Core Team Member of **Daintree**, Druva's next generation cloud native file system.
- Responsible for designing and developing control plane services to manage the storage entities lifecycles.
- Designed orchestration workflows for job execution with strict SLAs, developing message driven systems.
- Led the efforts to reduce storage costs on several initiatives like Daintree Migration, DDB Cleanup, HAProxy Scaling, Unified Control Plane, Graviton Adoption.
- **Skills:** Go, Python, DynamoDB, S3, SQS, RDS, Redis, Shell

Daintree Migration

- Designed the low-level architecture for a metadata migration orchestration system, to migrate more than **5M+** devices to the new daintree storage architecture with minimal customer intervention.
- Leveraged message driven architecture with SQS for high migration throughput with DDB IOPS consumption in consideration to ensure no disruption in ongoing backup and other storage workflows.

Daintree OPEX Optimization

- Led the effort to develop Layer 4 & 7 HAProxy horizontal scaling to support 7x growth in data plane traffic.
- Developed batched job system to support deletion of old file system data to reduce overall DDB storage costs.

Batch Scheduler

- Developed a batch scheduler for executing background jobs in a DFS within SLA constraints.
- Designed a secondary virtual index in DynamoDB based on execution time to operate on different SLAs efficiently.
- Implemented an message driven workflow using SQS to trigger job execution with token based allocation techniques.

Quarantine Bay

- Developed Quarantine Bay 🦠 feature to isolate infected backups after a ransomware attack.
- Developed Session Refresher, OAuth2 token management required during clean snapshot recovery.
- Implemented snapshot version filtering to create latest clean snapshot to restore and avoid it's compaction.

Software Engineer

Jul. 2021 – Jun. 2022

Persistent Systems

Pune, India

- Contributed in developing a shipping platform for **BlueDart**, managing more than **377M+** shipments per year.
- Developed Link/DeLink Paperwork feature, a location-based bagging of document envelopes to optimize tracking.
- **Skills:** Java, Spring Boot, Oracle SQL, Kubernetes

ACHIEVEMENTS

All Stars Award | *Go, HAProxy, Auto Scaling Group*

May. 2026

- Identified and resolved a critical cross region routing issue in our custom HAProxy service controller.

Outstanding Achievement Award | *Go, SQS, RDS*

Nov. 2024

- Recognized for contributions to the migration from DRST to Daintree, Druva's New Cloud File System.

TECHNICAL SKILLS

Languages: Go, Rust, Java, Python, C, SQL (MySQL, SQLite, PostgreSQL), JavaScript, Shell

Tools and Frameworks: DynamoDB, S3, Redis, SQS, Go-Kit, Tokio, NodeJS, Spring Boot, React, NextJS

Developer Tools: Linux, Git, Docker, Kubernetes, Amazon Web Services (AWS), GitLab, VS Code, Cursor

EDUCATION

Savitribai Phule Pune University

Jun. 2017 – Jun. 2021

Bachelor of Engineering in Computer Science

Pune, India
